Have you noticed that people, places and things are a bit different these how diverse groups of beliefs and creeds are beginning to take a differer understanding of our lives, the world and our beliefs? It is upon us like

Simple truths are coming to light more and more each day and with them more people who are beginning to realize the truth of the matter. I am no Christianity, or tear into the differences between religious positions or e texts. What I AM here for is to help, yes, the SOS has been heard. But a make sure that you realize that this is not about me, it is not about "My or having sex, or being of greed or war or hate. This is about us, about e and how we are dawning upon a time in which we will enabled to reach fo unthinkable; heaven, nirvana, paradise. Albeit as it stands the human ge change" and when something as finite and infinite as divine eternity is c imagine how this daunting thought can scare people more so than comfor what we have been searching for all these years, it is what we have kille lives lost are deeply unknown and make up a number so large it need not long count. But enough about why, or when, let us begin in the answering

While you probably know, a feat this large is by no means easy to lay ou especially so if it has the total intent to bring every living soul along wi ask for your patience, your imagination, and your willingness to give this been issued such information and more thankful to share it, so if you are truth of the matter I should just ask that you share this with people.

First off, I often wonder how many of you intuitively sensitive people out acknowledge that time itself is speeding up. Many might discount this as gets older, but not so, indeed time is beginning to speed up and it appea The reason for this elope in time can be placed upon several theories; th eternal life indeed time will speed to a point of non-existence, or, perha may have something to do with the approach of the Mayan Calendar's end we can theorize that our speeding up of the world via technologies is bri your answer or theory here the fact remains that time indeed is speeding

Perhaps the main reason that we cannot understand why things are speed same reason that we cannot free ourselves from the nearly sadomasochis brought upon ourselves. That reason has eluded humankind for thousands now. Some where along the timeline, whether it was ill intended, outright the sake of the competiveness in the human spirit, our notion of time and were clouded. If you notice, for those of us who go by the Gregorian, or lose/gain 1-2 hours a year and we lose/gain an entire day every 4 years.

But why? Why is it that our calendars and clocks had to be mistimed? All
relevance suggests that in order to keep human kind from reaching for th
place, that the people would never get there so long as the clocks and ca

And so hence we have some natural and logical answers as to why our ca

How do we get pass this faulty logic that keeps us pinned to the ground
eternally clipped? Easy, so easy is the answer to this that many may fee
