Wow, that's cool what happens, if it just hits us all in a massive photon belt of pure energy in 2012?

I.e. Rapture, Fire from the sky, that a weight of an atom counts???? why did Mohammed and many others throughout our history speak of the cleansing to take place?

Where people will be refined as gold in the fire?

Just an idea, yet wouldn't leave it out of the question as might be easier to clean in one go that way

Plus then those who are not interested in 666 = Carbon based life forms....won't cling on to this....those who are not ready well....we have had enough warnings if that did happen.....why our polls on here end then just encase....
