"Surprisingly, instead of continuing to increase or level off in brightness, Betelgeuse has decreased by ~0.5 mag from mid-May to mid-July," wrote a team of scientists headed by Andrea Dupree of the Harvard Smithsonian Center for Astrophysics in an Astronomer's Telegram dispatch. - [Betelgeuse Is Dimming Again](#)

Zechariah 14:7 It will be a unique day which is known to Yahavah; not day, and not night; but it will come to pass, that at evening time there will be light.

This is going to happen really sudden, when it blows.
