Though since I'm really nice; [here is our poetry book](#) explaining metaphysics for free.

A guide to [the 13 dimensions](#), that are the constructs of our reality; so when we meditate we ascend through conscious levels.

Plus here are the 7 Forms of Yoga correctly linked with the 7 Chakras.

This site also explains tons of errors in religious thinkings; like how [John](#), [Paul](#), and [Simon](#) the stumbling stone (peter), have mislead the world with Pharisaic Christianity.

The [Quran tried to rectify the religious errors](#), yet has made them worse by not dealing with exegesis.

Please note this is a start; there is so much info, made a site to share it all.
