Could the UFO's the ancients saw be of such great technology, and put them mistakenly called them God and worshipped them? The prophets of the old were instructed by space beings who came to them when they called on the name of the Lord. They were instructed of what to say to the people of Earth. Were they simply messengers of peace and good will to the peoples of earth in an effort to stop the corruption they had gone through in their pasts? This does not discredit God, it simply asks are Gods Angels really aliens? Maybe once we have the technology it will be clear. For it is known that we are all angels... we just need to awaken and create a universal society, and the only way to do this is to practice the words of love and togetherness. Would you want a primitive (humans) hostile race intruding if they had the technology to traverse it?
