Summary: Since this is my problem and finally after all these many life t
thanks to the divine teacher.

As parable it goes like this...

If an oak tree takes 30 years to grow, to be big enough to spread its frui
that the seeds it drops has the distance needed to receive enough light.
After this period of time as an oak, imagine the wind that was there and
left, and the more you impatiently expected it, the less happened.
So you begin to question your self and God about why not?
Then it hits you, how dare you!
As you have been provided for all that time with water, sun and life in wh
So what right do you then have, to demand that your fruit be heard?
None as in every movement there is a time, and if you waited you would
your fruit drops, is to totally disrespect for even being given the light to
which to drop the fruit or the space in life in which to live.

So this is me, and though this is also for all to hear, this is a problem I

As yes I do expect people to read and listen; yet I do also expect people

So this is what the site is about, as yes many prophets have spoken and

You see each angel must know these things to get into heaven, and not d

You see the wind stops blowing, the birds don't come not even a squirrel

So what happened to the oak tree to fix it?
It gave up, it stopped expecting God to do it for me as "I' demanded and
release of EGO the tree had got left?.
God heard and saw again as God can't look at darkness which is EGO so
So then the breeze came like magic and softly spoken, taking the acorns
finish the circle that had started such a long time ago.

So what is all of that?
Don't expect it!

It is desire;
And desire causes EGO!
This in turn causes more hell;
Less heaven!
So if you are going to be a teacher as the oak, then you to must learn th

If you share light it helps with out EGO contained and then because that
allows it into the person's heart.

Otherwise it just alienates them. Expecting they will listen as you tell th
fruit.

Can you imagine and oak saying to the squirrel come here and bury these

It just wouldn't and couldn't happen and very much like all of us are doir

The whole race has this as diseases, all these peoples, who think they k
over others.

So let go forget about pushing, your seeds and fruit and stop!
Be in the love of God first, and then others will see this!
Grow your self 1st and understand your self, then the rest of it will fall i

If everyone took this on board and understood this, then yes people woul

For each would then show through example; as then you are doing the pr
and through this people will then learn.

Also remember for all who stand shouting at God for not getting fruit, wh
went in; within the parable when shouting at God, and then you can't eve
ever get fruit like that, or help spread fruit?

Next with in all this is the parable is two fold; as I was told last night ar
an age, in which for childhood.
Which as in the oak are 30 as how can it cover to protect another tree, u
and stop the winds?
How can a female tree hold fruits until its branches, are large enough to
babies, in its branches acorns are heavy?
Also the oak doesn't stop growing its roots (mind) at any point it always
soon it wouldn't have any new food and suffocate its self after long.
Can you imagine, thinking it had got it!
Then sitting there with same small roots, how you will grow tall and not f

Artificial light produced by monitors and TV's can act as replacement yet
until it withers away as without knew growth the plants roots won't Grow.

There are many other trees and Species. The oak is connected to these o
all is connected; it feels what is around it through its roots connected to
tells it what others are doing.
Now imagine this oak sees a bit of the light and grows into that space ma
so. What has that oak just done? It has suffocated its own children throu
knew how to grow, yet the oneness has divine plan set in motion and whe
intended for its child. Yet the oak didn't know that as it was just seeing
self. If the oak had remained still and grown in its own space, Then that
and blossomed even more so then allowing a safe shelter for all of its ch
guarding all of nature as well as intended.
