Keywords: Anointing, Psychedelics, Cannabis, Enlightenment, Godliness,

Summary: Ancient religion used Entheogens globally to increase human i consuming alcohol & meat were banned in many enlightened societies.

Our brains evolve from what we put into ourselves, so though some have man can defile it', that isn't accurate, as everything we consume can cha way our brains develop changes the way we socially interact.

Religion has become devoid of its original intent, where instead of it bei Divine (Yoga), and a set of rules for society to live by, due to a Babylon that many ancient religions connected to God directly through entheogen consumption of meat & alcohol we no longer remember how that functione

Through scientific experimentation we are starting to understand how me how psychedelics can repair Neural-Pathways, and increase our longevity being practised by ancient religion, before a Babylonian system took ove entheogens, and to drink alcohol & eat meat instead.

When we consume alcohol, and eat meat, it makes us more Self absorbed many believe that "I Am" consciousness is a pinnacle of spiritual develop opposite, the highest nature is to be emptiness (Nirvana), where when w others before Self.
When we have entheogens like psychedelics & cannabis, they can dissolv allow us to recognize that the whole of reality is made from consciousnes energy is universally the same within all of us (Oneness).

Carl Sagan explained that "we're all made from the same star stuff" or in Buddha realized we are all part of Universal Music (Sant na).

When we drink alcohol it muddies the mind, slowly damages every part of empathy, telepathy, memory, and even grey matter, so we get less intelli

When we take psychedelics these increase the brain's Neural-Connectivit then allows us to think quicker, more intuitively, and create new pathway accelerated rate.

Our bodies have an endocannabinoid system, which regulates our nervous regulated by the brain, where at our neural receptors is a place for cann for neural firing, which is why with illnesses like Parkinson's, Epilepsy, firing of the brain, CBD can regulate the over firing.

Cannabis & psychedelics both help Neuro-Regenesis, so repairing, and re
pathways.

A way to understand the process with mushrooms especially, is that withi
connect to the mycelium to feed from it, and this then connects all the tr
neural network, our brains work the same, so eating the right type of mus
keeps our brains, and bodies staying more functional, whilst even keepin
controls the whole vitality of the body.

Now with modern understanding of the brain we can better comprehend w
us, so for example though coffee seems to keep us awake, it is by increa
our fight or flight chemical, where this can make us jittery.

When we look at the experiments done by NASA, where they gave spiders
see what happened, on coffee the spider couldn't make a working web, or
still did the job (yet with less work), with psychedelics a more intricate w
smaller insects; thus if we use that as an example of what it does to us,
being more irrational doesn't mean we get the job done any quicker, whe
psychedelics with cannabis, means we're regulating a more advanced way

Now lets take this back to ancient religion:

Where in the Dharmic culture they had Bhang, which was a cannabis & mi
many believe to be a form of mushrooms like Fly Agaric or some form of
Himalayas.

The Zoroastrian priests had Haoma which is clearly detailed in the texts,
which had sacred geometry within its shape, sounding very much like the

The Hebrews had the Holy Anointing Oil (Exodus 30:23-25), which should
which is where the Greek transliteration of the Semitic word, is where we
from.

The Shewbread in the Bible was made the same as the Essene Bread, and
recipe, which because of the natural proofing of allowing sprouted grains
ergot, which was boiled, and then baked to kill the ergot poisoning within

The Greeks obviously imported Cannabis from the Semitic cultures, and t
Mysteries, they had a barley drink with Pennyroyal, which was left in larg
culture placed into them, which then caused the liquid to go black, it was
poisoning, and this with an advanced ritual, where they were taught the i
the Greek language, and advanced theology to understand how the univer

The Roman Emperors, the Greek Philosophers, attended Eleusis, until Ch
destroy it, whilst not understanding that Christ was the anointed one, an
Cannabis Anointing Oil, and the Shewbread helped lead the prophets to e
Eleusinian Mysteries had been lost.

Now in modern times we have people realizing that Micro-Dosing can incr

where we have films like 'The Lawnmower Man', 'Limitless', & 'Lucy', sho
substances like LSD/Psilocybin, can make anyone become a Genius.

Originally the terminology Genius was the idea of having a Muse, and be
where on using psychedelics, we can literally connect to the higher realm
can communicate with us directly.

The Shewbread means the 'Bread of Many Faces', where it basically allow
priests to hear God, it wasn't some faith based system as we've been led
neurochemistry, where using the right foods allows our bodies to become

Within advanced forms of Yoga, it isn't just about stretching as taught in
spiritual connection to the Source of reality in all aspects of our being;
whilst meditating (Raja & Jnana Yoga), we can literally hear God.

Bob Marley said, "When you smoke the herb, it reveals you to yourself."

Many of the world's most revolutionary artists, musicians, comedians, etc
most amazing material whilst high on cannabis, and mind expanding whils
Beatles became more thought provoking, once their minds had increased

The problem within the sixties starting a movement of revolution, is it th
opposition, rather than to evolve everyone's thinking, that we need certa
like we get scurvy without vitamin C, without the use of psychedelics (no
yet more as a form of nutrition), the brain starts breaking down.

Same applies with cannabinoids, that we need them to regulate Neural-Fi
become skittish in our thinking, where we then become detached from our
static we've become, compared to our dynamic childlike self.

It is fascinating how with Ketamine, they can give it to children up to the
make them trip out; almost like our brains were wired to see a mystical w
are imaginary friends, and to imagine amazing adventures with our toys.

What if we were always meant to be like this, living in a dream, and due
types of psychedelics in our diet, that exist everywhere in nature, we've
harmonized, balanced, and consciously aware.

Comparatively if we look at the last few thousand years, where mankind h
to stop us using these entheogens, religious textual evidence misidentifi
it almost seems on purpose for so many to have lost the core component

Take into account that the word Entheogen, means 'to Go Within to Gene
from Delos meaning 'to Reveal', and Psyche means the 'Self', so the anc
substances would allow us to Connect to the Divine (Yoga), as did the ar

Imagine if we recognized how poisonous drinking alcohol is, where 100%
small percentage partially kills us, and the same with eating animals, wh
studies show that a vast majority of illnesses are due to it clogging up o

weren't designed to eat meat every day as we do.

If we reinstituted after a scientific understanding of how psychedelics, a
neural functionality, we could revolutionize society, restore the Dharma/
rebuild society from within.
When the book of Revelation refers to Babylon the Great, it points out ho
blood of the saints', so they're blinded to seeing the intricacies in the te
being stated across the world's religious prophets (who used entheogens
into an age of limitation, and ungodliness, as drinking alcohol & eating m
as it lowers our consciousness.

There is a problem within the use of entheogens without a spiritual backi
to the metaphysical, where there are also many levels of consciousness
levels are evil, and the higher levels are Divine, this is where just rando
needs reigning in, and it needs to have the development of spiritual awa
that people are heading in the right direction of deep meditation with the
schizophrenia with their inner demons.
