Summary: Ancient religion used Entheogens globally to increase human i
consuming alcohol & meat were banned in many enlightened societies.

Our brains evolve from what we put into ourselves, so though some have
man can defile it', that isn't accurate, as everything we consume can cha
way our brains develop changes the way we socially interact.

Religion has become devoid of its original intent, where instead of it bei
Divine (Yoga), and a set of rules for society to live by, due to a Babylon
that many ancient religions connected to God directly through entheogen
consumption of meat & alcohol we no longer remember how that functione

Through scientific experimentation we are starting to understand how me
how psychedelics can repair Neural-Pathways, and increase our longevity
being practised by ancient religion, before a Babylonian system took ove
entheogens, and to drink alcohol & eat meat instead.

When we consume alcohol, and eat meat, it makes us more Self absorbed
many believe that "I Am" consciousness is a pinnacle of spiritual develop
opposite, the highest nature is to be emptiness (Nirvana), where when w
others before Self.

When we have entheogens like psychedelics & cannabis, they can dissolv
allow us to recognize that the whole of reality is made from consciousne
energy is universally the same within all of us (Oneness).

Carl Sagan explained that "we're all made from the same star stuff" or in
Buddha realized we are all part of Universal Music (Sant na).

When we drink alcohol it muddies the mind, slowly damages every part of
empathy, telepathy, memory, and even grey matter, so we get less intelli

When we take psychedelics these increase the brain's Neural-Connectivity
then allows us to think quicker, more intuitively, and create new pathway
accelerated rate.

Our bodies have an endocannabinoid system, which regulates our nervou
regulated by the brain, where at our neural receptors is a place for cann
for neural firing, which is why with illnesses like Parkinson's, Epilepsy,
firing of the brain, CBD can regulate the over firing.

Cannabis & psychedelics both help Neuro-Regeneration, so repairing, and re-creating pathways.

A way to understand the process with mushrooms especially, is that with truffles you connect to the mycelium to feed from it, and this then connects all the truffles to the neural network, our brains work the same, so eating the right type of mushroom keeps our brains, and bodies staying more functional, whilst even keeping the brain controls the whole vitality of the body.

Now with modern understanding of the brain we can better comprehend what is going on with us, so for example though coffee seems to keep us awake, it is by increasing our fight or flight chemical, where this can make us jittery.

When we look at the experiments done by NASA, where they gave spiders coffee, we see what happened, on coffee the spider couldn't make a working web, on psychedelics it still did the job (yet with less work), with psychedelics a more intricate web was made by smaller insects; thus if we use that as an example of what it does to us, being more irrational doesn't mean we get the job done any quicker, where using psychedelics with cannabis, means we're regulating a more advanced way of thinking.

Now let's take this back to ancient religion:

Where in the Dharmic culture they had Bhang, which was a cannabis & mushroom preparation, many believe to be a form of mushrooms like Fly Agaric or some form of Amanita from the Himalayas.

The Zoroastrian priests had Haoma which is clearly detailed in the texts, which had sacred geometry within its shape, sounding very much like the Eleusinian Mysteries.

The Hebrews had the Holy Anointing Oil (Exodus 30:23-25), which should be made from spices, which is where the Greek transliteration of the Semitic word, is where we get the word from.

The Shewbread in the Bible was made the same as the Essene Bread, and the recipe, which because of the natural proofing of allowing sprouted grains to ferment, ergot, which was boiled, and then baked to kill the ergot poisoning within the bread.

The Greeks obviously imported Cannabis from the Semitic cultures, and the Eleusinian Mysteries, they had a barley drink with Pennyroyal, which was left in large jars, where the culture placed into them, which then caused the liquid to go black, it was a natural poisoning, and this with an advanced ritual, where they were taught the meaning in the Greek language, and advanced theology to understand how the universe worked.

The Roman Emperors, the Greek Philosophers, attended Eleusis, until Christ came and destroyed it, whilst not understanding that Christ was the anointed one, and the Cannabis Anointing Oil, and the Shewbread helped lead the prophets to the Eleusinian Mysteries had been lost.

Now in modern times we have people realizing that Micro-Dosing can increase

where we have films like 'The Lawnmower Man', 'Limitless', & 'Lucy', show substances like LSD/Psilocybin, can make anyone become a Genius.

Originally the terminology Genius was the idea of having a Muse, and before where on using psychedelics, we can literally connect to the higher realm and can communicate with us directly.

The Shewbread means the 'Bread of Many Faces', where it basically allowed priests to hear God, it wasn't some faith based system as we've been led to by neurochemistry, where using the right foods allows our bodies to become

Within advanced forms of Yoga, it isn't just about stretching as taught in spiritual connection to the Source of reality in all aspects of our being; whilst meditating (Raja & Jnana Yoga), we can literally hear God.

Bob Marley said, "When you smoke the herb, it reveals you to yourself."

Many of the world's most revolutionary artists, musicians, comedians, etc. most amazing material whilst high on cannabis, and mind expanding whilst the Beatles became more thought provoking, once their minds had increased

The problem within the sixties starting a movement of revolution, is it the opposition, rather than to evolve everyone's thinking, that we need certain things like we get scurvy without vitamin C, without the use of psychedelics (not yet more as a form of nutrition), the brain starts breaking down.

Same applies with cannabinoids, that we need them to regulate Neural-Factors become skittish in our thinking, where we then become detached from our static we've become, compared to our dynamic childlike self.

It is fascinating how with Ketamine, they can give it to children up to the age of 12 to make them trip out; almost like our brains were wired to see a mystical world where we are imaginary friends, and to imagine amazing adventures with our toys.

What if we were always meant to be like this, living in a dream, and due to the types of psychedelics in our diet, that exist everywhere in nature, we've become harmonized, balanced, and consciously aware.

Comparatively if we look at the last few thousand years, where mankind has been told to stop us using these entheogens, religious textual evidence misidentifies them, it almost seems on purpose for so many to have lost the core component

Take into account that the word Entheogen, means 'to Go Within to Generate', from Delos meaning 'to Reveal', and Psyche means the 'Self', so the ancient substances would allow us to Connect to the Divine (Yoga), as did the ancients.

Imagine if we recognized how poisonous drinking alcohol is, where 100% of a small percentage partially kills us, and the same with eating animals, where studies show that a vast majority of illnesses are due to it clogging up our

weren't designed to eat meat every day as we do.

If we reinstituted after a scientific understanding of how psychedelics, and neural functionality, we could revolutionize society, restore the Dharma/ rebuild society from within.

When the book of Revelation refers to Babylon the Great, it points out how 'the blood of the saints', so they're blinded to seeing the intricacies in the temple being stated across the world's religious prophets (who used entheogens) into an age of limitation, and ungodliness, as drinking alcohol & eating meat as it lowers our consciousness.

There is a problem within the use of entheogens without a spiritual backing to the metaphysical, where there are also many levels of consciousness & lower levels are evil, and the higher levels are Divine, this is where just random needs reigning in, and it needs to have the development of spiritual awareness that people are heading in the right direction of deep meditation with the schizophrenia with their inner demons.
