At one time or another, each of us has had rapturous experience with mu
emotion in us. Certain sounds and rhythms induce in us, a trance-like me
world, there are so many genres of music for our choosing, ranging from
Electronics, Punk Rock. As there are music that heal, there are music th

Let us first explore the dynamics of music in nature. We might take it for
of the birds greeting every new day. If you listen closely, birds use the b
white keys for expression. For example, if a dog cries in A, it wants som
does the same. A mother will intuitively read her baby's sound, and thus

Zanda, a bird-lover who discovered the birds' melodies, exclaimed, "I did
when I first realised that, and it was cool until one of them hit a white k
friends, he used to chat with them as a kid. He walked for miles and ther
warned him not to walk a path by their melody. He always listened, and f
experiment with the bird's melodic rhythms, get a few people play only o
keyboard. You will get interesting harmonic melodies. (And aren't he righ
you just can't go wrong with that!)

And, if you haven't noticed, songs that are primarily on black keys can b
Listen to Yanni's End of August for a starter. The Chinese understood th
guzheng which is a beautiful stringed instrument, has strings of black ke
for the distinct flavour of Chinese music. For white keys, you just have t
keys are white keys split into half, literally. It is like the transitions, the
So, it is no wonder that when you are primarily playing the transitional k
created. It is not unlike the Tibetan concept of bardo or in-between state
keys are conscious expression, whereas black keys are of the unconsciou

Sound is crucial for our state of consciousness, a high vibration will spe
activating dormant parts. The mass humanity uses less than 5% of our br
awakened are the likes of intuition, high creativity, and the ability to tap
superconsciousness or Akashic Records. On the other hand, when we list
they will pull down our emotional state and create confusion in our brain
emotional body and ego being on overdrive. This is literally indulgence i
physical body. Now, we are talking about sounds and music that we can p
"invisible" sounds? Sounds that we can't hear doesn't mean that they don
more powerful as they subliminally influence us.

The dolphins, keepers of the Divine Mother energy of the Earth, use a fir
with each other. The very sounds they emanate are healing, and have be
positively stimulate the neurons of unborn human babies. Pre-natal moth

experiments are reported that their children are highly intelligent, creati
babies not exposed to the dolphins. Plus, the mothers had easier labour,
birth in water.

And then there is the mystery of the missing keys, B# and E#, yet to be s
picture them in 3D, they are "there". Also, sound is made up of length, w
is "time" as 4D, sound is animated and you get music. Let's also look at
rhythms _ -- -- _ -- _. You add an expression to a mountain of --yin or _y
can have a weak fire on a strong mountain. This applies to music also, a
of the I-Ching with either rhythm and the end will add that expression in
unlimited rhythms cross-referenced with automated melodies in-sync with
subject."

Anyhow, start listening to the birdsongs and birdspeak, and tell us what
