Ok the plan sort of goes like this...now any word in Articles or Forum that may be instantly made into a Wiki Page all you do is add ([-[ ) around anyword wiki page unless already done....So in the end we will have

1)Articles = Works by many of belief's idea's and things that help people...

2)Forum = Converation of Articles

3)Any word in them that may need explaining in Wiki can be added to the

The idea is to make clear levels...some bits need modifiying alot and we you see in Forum for instance that needs more clarity....

Can then be added into the wiki...these pages can be arranged by any of as and after these modification take place...

To make it that a wiki-page can go back to be published as an Article...s arrange...not they, as us, is them...say friend and things happenz...
