Namaste,

Things getting easier by the day hopefully....

1) A Wiki means fast...it is used in the site now.. like this.... by adding word....like this [->[ ]] you instantly create a Page in the new improved Wiki s it is like something that all can edit also.....yet main point for us..is this what you write in either and Article or forum post that needs more explai these in our own forum post or article often this distracts from said poin keyword within the article..that you may have knowledge of, yet others d word by adding the brackets....That gives you a whole page in the Wiki t word...
So for instance, like this people is not what we want to do...

The reason we are adding this, and still more work to be done on our par that you can simply take the 13 dimensions, make a copy into the Wiki ar means other can also...and so we can re-open the books when we get aro all....aka Quran, Bible ect...as whole books in a Wiki anyone can edit ou refine them and fix the missing translations....
