"The Bible is not only a book--it is also a computer program. It was firs handwritten on a parchment scroll, finally printed as a book, waiting for inventing a computer."

"To find the code, Rips eliminated all the spaces between the words, and Bible into one continuous letter strand, 304,805 letters long. In doing th the Torah to what great sages say was it's original form."

"Rips explained that each code is a case of adding every fourth or twelft word. Skip X spaces, and another X spaces, and another X spaces, and spelled out. As in this paragraph.*"

"Harold Gans had spent his life making and breaking codes for American trained as a statistician. He spoke Hebrew. And he was sure that the Bi wrote his own computer program, and he looked for the same information was surprised. It was there. The dates that the sages were born and di names."

"The Pentagon code-breaker, using his own computer program, had indep Israelis' results. Men who lived hundreds and thousands of years after t encoded in detail. Rips had found the dates. Gans had found the cities.
