Quote:
The self, especially as distinct from the world and other selves.

In psychoanalysis, the division of the psyche that is conscious, most imm
and behavior, and is most in touch with external reality.

An exaggerated sense of self-importance; conceit.

Pride in oneself; self-esteem.

All of these are taken from dictionary.com

When I refer to Ego, I mean these. As well as within the spirit. where the
being oneness, to being independent and self centered.
Also the Ego can be a plastic shell, as such around the person, so that t
right.
A company or country can have an Ego, thinking that something they are
else and inforcing that, as they believe it is right.

Then when people die and have their life flash before their eyes or soul,
horrible person, they have been as there is no external shell to hide it.
As when people die they get to see alll the ramifications of their actions
Which for many they didn't realise, they had to be aiming for oneness an
people!
