Why do humans and primates have a defective GULO gene in their livers
of ascorbate synthesis, forever damning them to hypoascorbemia, while 9
are not so afflicted?

_____

Great question one for the ages - i'm still trying to figure out why we [al
same fashion - why some of us would not just breath and take in Nitroge
Oxygen - exhail the rest.

Maybe God's genetic blueprint can only vary so much?

Keep breathing live awhile - be sinless live forever.
