Cancer has been shown to only thrive in an acidic environment; everywhe
is white similar to a type of fungus. Fruit seeds such as soursop, apricot
etc, are naturally immune to the fungus produced as the fruit rots, and th
attack the cancer cells. We have to be careful on the amount consumed,
cyanide, which will also lower the blood oxygen levels; yet this is like an
amount, it will give the body the resources it needs to fight it. Since can
environments, some things help, like going vegan, no alcohol or eating d
acidity. It is also possible to apply a bleach solution onto the affected a
attack the cancer, allowing the bodies own immune system to then see it
