Some of them do have time travel, to figure future events. I have a book century, was doing out of body stuff and going to the akashic record of t machine age coming. The papacy then killed all knowledge of the spirit, the future. They then will bring back the knowlegdge of the spirit in thei which has alraedy been done. The book is "Spear of Destiny" by Trevor R like that. So Ufos aint the only ones reading the future, the vatican is to satanists are doing it to, along with satan himself. In fact in montauk, Lo particle accelerator up there, thats tied to the philadelphia experiment. have went back in time and tried to kill Jesus, but it didnt work.
