I've just come to the conclusion wiz... that God is not answering our prayers, us the power to do things such as turn the seas red with blood... we now have technology... yet the government is holding these things from us... because they will give everyone a little black box, the size of a radio that could power the car in a car so that no car would need gas... then our greed would be corrupted by MONEY, the true root of all evil. There are brilliant scientists out there, who can change the world through he means that we can. We have come to the conclusion that who sit around and see the catastrophic disasters happening around the world, and "get right with God, Jesus is coming back"! is exactly what is stopping us. We have been handed the power to us now, it is OUR responsibility to save humanity, to give light to others, give up your wealth and your reputation so that you may save lives! We need to save planet Earth, and no one is going to help us, the world is full of people who feed off of greed and green paper. Wiz, we have every technology ask for being held top secret and put away because if it ever got out the world would be corrupt. We can fix everything ourselves, but people are directing their energy and needs to be directed at the government, all of humanity needs to come together and shift in the way the whole world economy works. Once we have this technology there will be any need for money. Heaven on Earth? Let's make it truly happen, we need to be here Wiz, we're all bright, we see the fallacies in "Christianity"... they will continue to preach from their bible while humanity burns in the lake of fire and perishes forever because no one took the responsibility to save ourselves. I'm just getting to the point i was even trying to make now haha... anyway, i love you man, please think about what we should really be trying to do... win a religious war, or let them not going to help us... they've already tried. More than once. I'm out love, that banned me... it's ok, if you really really really wanna check it out i'll be glad, i don't wanna start anything, if they banned me, they aren't going to listen to me. About technology they couldn't understand, the reason they banned me. What are the laws? the 100 years of science we have that we think are set in stone?
