Wiz.. I propose that we make definitions for controversial words. Words of spirituality has to do with emotions, logic and reasoning. I say this because I placed here with the intention to speed up those evolutionary processes. I mean meaning or definition for the word... let's start compiling a Wizanda dictionary meaning or multiple meanings so people can very easily access it and understand what we speak of. This will also give new members a reference point whereas to understand pre-rooted meanings that have been derived from organized religious sources deceive... although in some way they do... but we need people to understand what words mean. They are always thrown around so loosely... sometimes I wonder what meanings they have.
