Well after just going to chill out in the sun and listen to the birds, for the first time between a band....

(Swap black note for the main scale including B# and E#; use white for first note (it has its own inheritant expression or feeling to it)

Then you will start to see with the bird s melodies what they feel in the way they are expressed....

Why am I adding it to this thread...?

As the way it works in a conversation with birds is there is a clear melody that follows the rhythm off life to miss a bit by over talking is rude and not in synchronicities.

So in a democracy it has to be this way, we have lost this since the fall, with this fact, that we can communicate with birds and most animals through communication, as I mentioned...

We have also lost this point that when the first was speaking, it normal t said it disagreed it let it speak first, and then it replied why it had misu left it to the wiser one.

Not an argument in sighted from a mistiming of the actual statements in

This is a good reason for a forum, in some ways, yet it can still happen y person&

So if we as people will ever get anywhere we need to take this basic prin communication system. And pauses spending the time to allow the other t think about how a true guru or enlightened person is, they do this and ad

Yet a lot it is overlooked&. with in our democracy if we think of how our arranged yes they are supposed to wait.

Yet you also should pause in any matter, for second, for a breath; before How many of us do this in everything&I am going to practise and hopefully this first within our self s and then as global community; learning to take as nature does!

The only time I have heard birds not doing so, is in a fight where it beco conversations&.

So there is no debating,
There is just relating,

It s a rhyming end,
To hopefully mend,
To find a way,
In how we say,
To rescue the day,
For a democracy;
Instead of affray
