Now with many people hooked on some part of life and some of those los
this is to show how every addiction is the same source a need for dopam
is how to fix the issue.

Now many people assume a drug addict is something different to them se
on the subject.
As many people we all meet at some point get hooked on a bad addiction
some of us who have to have a coffee in the morning or play squash ever
It's the same thing a need for this lack of dopamine, now what does stim
explaining for those who don't know.
It is the chemical released by the brain when you enjoy your self, now th
sources or activities, yet is this same chemical.
Now with the mistake in many peoples languages of missing unconditiona
and many presume this to be love and missing the real love that is alrea
Now in some of us we try everything searching desperately for this chem
our self's.
Now some believe the drugs made this and this is sort of a big error by t
responsible whether they like it or not.
As when the Bible contains cannabis as being holy as do a lot of other re
to a shaman and in that Christ was a shaman as clearly written.
Yet that is separate point and can get very long winded, for those who w
and why yet given the anointing oil contains cannabis as written and offi
can not be called a drug, if it is holy and as such then a large epidemic
additional support would solve so many problems.
As officially due to this every church should endorse cannabis use and g
is on the subject of another chemical as it is vitamin M
Dopamine is then produced by said Anandamide which is also stimulated
considering we are dealing with a root of brain activity.
Do you not see when half of us swap from one dopamine stimulant to ano
disrespect of any religious books world wide the church condemns that o
Now this may sound to many we have got it all back to front and we will
prove all of this daily and are willing to go to trial to prove said facts, y
opposite.
So all these dogmatic people who instantaneously go against most of tha
drug yet a medicine that dates back through out our world, it heals many
ms and so many other Christ was called a magician by many.
Yet all it is the holy anointing oil, now the point being is it relatives and
cannabis only partially and maybe allowing this to be encouraged may he
church we have been in.

It is disgusting especially when hell is ego, and so in that we have to wa
coffee oops another vitamin oh and chocolate.
Now people also get addicted to them also containing Anandamide and vi
senses.
Now instead of people getting hooked on heroine and man made pharmac
oil as intended and then we can have real world as it was before we bann
those who haven't read brave new world the substance given to relax the
something new it is simply a Christian?
So really who are most Christians kidding? Them self's our children and
something doesn't change about this.
Anyways we will get that to be an article, yet first there is a large sectio
addictions with everyone included as all have addictions, it is just recog
our self's and that is in fact an addiction so we swap and change, yet re
our self's not that I know of, and anyone else who is human for that matt
So if you can see all addictions come from one source lack of Anandamid
can be maintained by humming or meditation as Buddhist like to call that
melody that we all have, it is not allowing your heart to be filled up with
least.
That helps understand it is in all and we can hum all day releases Anand
slightly where as cannabis not dried yet made as perfumer would as to al
to be added to oils causes them to bond, and in that we have multivitami
intended 2000 years ago.
