Ok a list of points wishing to achieve with the entire site, so any help is

1 Clean easy flowing system, no edges!

2 Making the links directory clear and with each page title of the link and include all that it can about every site on here.

3 deleting and arranging all links into their own folders, each can be moved and choose where and which is right between us.

Making not extra folders yet less!!

Quote:

Much of the web has become a jumble sale, now we are working to fix this so you can learn do and think to study any track.

yet allowing somewhere that is like an open university, yet so damn fun that the grave (may angels be accursed for standing against him)

Ha well we do and as we are far more scared of God, then someone who is stuck to his own liking long enough!

In other words if it is any system of religion it is going in its own category

If it is spiritual and open minded enough not to be classed and need a bunch of people with.

Then it is spiritual as that basically means to understand who you are.

The fact religion tries its best to frown on said people by allowing every one categorised and ordered...this is effect of religions....

So even sciences can go into religion as that is where said evolution of

Now given that it is clear way to separate sheep and goats so if you find people that are not spiritual or vice versus....

As then without too many extra categories as we have now all can be in a clear path of any web site leads....

This means then we all have a systematic order if you go somewhere and  
behaviour to an idea or concepts that overrules basic politeness and kind

Then that is religion....just to add it is like web programming it self...  
Now if I made modules using what I learned on a zx spectrum 64 at about

Then you wouldn't see this site or be able to talk freely... so in all writt  
granddad who speaks 6 languages understood and said to me.....

Yet within his understanding is that or Pollish, German and Russian which  
different and then we have this later language you see here called Englis

Now evolution of creature is far slower in comparison and in that is grea

You see anyone carrying an old book and saying it is that in which they f  
and so looking backwards....

Probably why Christ said to his disciples even down to them ALSO that fr  
this would not be accepted for what it is....

This is that a mustard seed is written within many different books world

Now some of you call these religions.....???

How dare you is all we can say coming from there and speaking very muc  
this...

You see in saying Buddhism is a religion you deny the one thing that Buc  
freedom of ego, so in requiring a given contract to say I am this or I am  
none being in Buddhism denied....

This also applied to Christ saying that many will say (I am) and so on as

As we are this we are that and anything else is just to be....

So lately we are reorganising our own directory to clean system like this  
over the old ones, which can be edited at any point to include as much in

The comments can be posted by guests and we are checking these so all

Any way if you can help report spam links that existed from earlier as so  
was open to any without admin intervention messed the system up we did

Yet due to the nature of the net added to many brackets and categorise m  
begin with.

Now as it grows we may add more categories again if you wish...

Yet this is only to allow specifics like separating books and music resou  
categories of course making a better visible url from goggles page title r  
people find it.

Yet again though within this entire site if you feel a site is over commerc  
allows us to delete it after checking.

Then between our self's we can make a universal easy system that isn't g  
or in my case on dmoz 3 years????

Thxz for doing and chat in real time on the chat system for help....

Peace all
