creationism and evolutionism are both wrong.

As stated before, Both believe in linear time thus they cannot explain this first, the chicken or the egg? this is the same question that Stephen Hawking asked, a question that western philosophies and believes have pretended to know.

"Matter is not created neither destroyed, it can only be transformed" This is the law of conservation of matter in our world. It was stated by Lavoisieur. Later explained by Einstein $E=mc^2$, energy can be transformed into matter. This physical law explains clearly that matter cannot be created or destroyed. Do you still think that God created matter? Judeo-Christian believes are not consistent with evolution.

Eastern believes on the other hand, have offered the answers to these questions. The evolution of life in judeaism took place. Scholars nowadays agree that Asia, specifically India and China is right there too. The oldest cultures, the oldest wisdom form the world are being forgotten.

God is in the realm of the unlimited. God is a soul just like us. Souls do not die. The scriptures were written by human beings. All of them have mistakes. It is not blind, but rather; faith in the intellect in our reasoning is what will allow us to find God. All, reasoning is what makes us search for God, the ultimate. God is a reality.
