Just another BIG point to add to this, so far I've noticed PHP doesn't rea
it doesn't read TAB, it reads spaces just; yet really even those are evil {
meant to live when it takes a week for your site to load

)....

Been finding loads of spaces in Chinese/Japanese code, where the space
if searched for..so I presume these are tabs, as they provided a double s
them to begin with....

Yet on doing so there is a considerable amount of relief in the time it ta
saying relief is, because you could see the PHP struggling over certain f
were the cause of these

.
