Namaste

I read the article on gases and liquids

I still have big problem, what caused these to interact in the ways in which

Take a step out of the picture for a minute, if you get my meaning.....

Why can we with science, find these theories, you say that matter has to be matter?

Why is it not just random lines, all over with no form?

Why can we have a periodic table, with mathematical equations to it?

What caused it to have principles, in which to work with in?

This is what I was trying to explain, as for there to be:

A building there needs to be a builder with a plan; else the building will

For a painting a painter with an idea, if not you will end up with a messy

Can you see my point from these; why are so many things in the world in symbiosis.

Why is every animal catered for?

Why does matter get sucked in to a black hole and come out as ultra viol

Do you get my point, there is something out side of the picture else it wo

There wouldn't be mathematical formulas, for us to think we discovered,

Your thoughts?

Peace N love B with U
