Dude... i have some highly classified info on some goverment UFO project plasma shielding a triangle craft causing a negative G-force effect, to the means even the occupants inside can take 90% more G forces... imagine Why aren't we using this stuff for space travel publicly? Are we being held back? things on earth are not peaceful enough yet... who knows... i think if i stay a couple days i can figure it out. i'm out, hope to hear from ya soon man, I also theorized this may well be why E.T.'s are always documented as extremely weight you carry, the faster you can go... the less G-force that is applied weigh less! Less matter/mass! What they need to do is put some type of shield on the craft so that the occupants get to zero point gravity, and can travel as fast as force whatsoever. p.s. the government needs my ideas... lol i can get us out in 20 years... just teach me the advanced hidden physics. I just love it when i live for.
